The webcast replay will be available one hour after the conclusion of the live presentation and archived for 60 days.

### **About NanoString Technologies, Inc.**

NanoString Technologies is a leading provider of life science tools for translational research. The company's nCounter® Analysis System is used in life sciences research and has been cited in more than 3,000 peer-reviewed publications. The nCounter Analysis System offers a cost-effective way to easily profile the expression of hundreds of genes, proteins, miRNAs, or copy number variations, simultaneously with high sensitivity and precision, facilitating a wide variety of basic research and translational medicine applications, including biomarker discovery and validation. The company's GeoMx™ Digital Spatial Profiler enables highly-multiplexed spatial profiling of RNA and protein targets in a variety of sample types, including FFPE tissue sections.
